

Dry Film Laminator

Model: SFB-240

Features

Fast warm up from cold.

Lamination rollers are made from heat resistant hard silicon rubber, the best material for lamination of dry film photo resist on FPC&PCB board

Dual cylinders ensure precision balanced roller pressure across the complete width of the panel

Best possible lamination speed and reduced dry film waste

Specifications

Power	AC 230V at 50/60Hz 15A
Board Thickness	0.05~3.2mm (optional 10mm)
Dry film size (W*T)	240~610mm*15µm~76µm+ custom build for larger sizes
Speed	1~4 Metre /min Adjustable
Min. Air pressure	3-5kg/ cm2 16L/min
Laminating temperature	50 deg C~200 deg C- Fully adjustable
Exhaust	4 Inch outlet.
Dimension (L*W*H)	750mm*1120mm*1400mm
Weight	160kg
